SUMMARY

Fresher Cloud & DevOps Engineer with hands-on, project-driven experience in Azure infrastructure automation, Infrastructure-as-Code, and CI/CD security. Specialized in Terraform, GitHub Actions, and IaC security scanning. Security-first, automation-driven, and looking to bring that rigor to a full-time DevOps role.

TECHNICAL SKILLS

Languages: C, C#, Java, JavaScript, HTML, CSS, MySQL, PHP 8.x, MySQL, REST APIs

Cloud & Infrastructure: Microsoft Azure, Terraform (IaC), Azure Application Gateway, Azure VM, Docker (basics), Kubernetes (basics)

CI/CD & Automation: GitHub Actions (OIDC / Workload Identity Federation), Azure DevOps, Git & GitHub

Security & Governance: tfsec, Checkov, Microsoft Entra ID (RBAC), Cloudflare, Infracost, Trufflehog, Tflint, Trivey

OS & Scripting: Linux (Ubuntu), Bash, PowerShell, Python, C++

AI Harness: Antigravity CLI

EXPERIENCE

Cloud & DevOps Engineer Intern

Jan 2026 – Present

DevOps Insiders

- Architected and provisioned a secure multi-tier Azure network using Terraform, including segmented subnets for Application Gateway, Linux VMs, and Azure Bastion.
- Implemented Layer 7 traffic routing and load balancing with Azure Application Gateway across frontend and backend Linux VM pools.
- Secured cloud infrastructure using Network Security Groups (NSGs), Azure Bastion, and NAT Gateway, controlling network access and outbound connectivity.
- Automated Terraform validation, planning, and deployment through GitHub Actions, applying Infrastructure-as-Code and CI/CD practices.

EDUCATION

J.K. Institute of Applied Physics & Technology, University of Allahabad

M.Sc, Computer Science

Prayagraj, Uttar Pradesh

2026 – 2028 (In Progress)

Ewing Christian College, Allahabad

B.Sc, Mathematics & Computer Applications

Prayagraj, Uttar Pradesh

2023 – 2026

PROJECTS

Azure Hub-Spoke Network Architecture & Secure IaC Automation

Dec 2025 – Jul 2026

Tech Stack: Terraform, Microsoft Azure, GitHub Actions (OIDC), tfsec, Checkov, Microsoft Entra ID, Linux

- Architected a multi-tier Azure Hub-Spoke network with modular Terraform, reducing infrastructure provisioning from days to under 15 minutes.
- Deployed Azure Application Gateway to load-balance a dynamic web application across 3 Linux VMs, securing traffic with subnet segmentation and NSGs.
- Automated secure CI/CD for Terraform using GitHub Actions and OIDC Workload Identity Federation, eliminating stored service-principal secrets.
- Integrated tfsec and Checkov into pre-merge workflows, blocking 100% of detected IaC misconfigurations, with access controlled through Entra ID and RBAC.

FlexZone — Fitness Tracking Platform on Azure

Dec 2025 – April 2026

Tech Stack: PHP 8, MySQL, JavaScript, Chart.js, Terraform, Azure VM, Cloudflare

- Built and deployed a PHP 8 REST API with MySQL, supporting fitness tracking, calorie estimation, analytics, gamification, and leaderboards with sub-200ms response times.
- Provisioned and secured the Azure VM environment with Terraform and configured Cloudflare CDN for the custom domain, improving content delivery speed by ~30%.
